- Centric Express 2024 - Session 2: .NET
- C++ Programming - From Beginner to Beyond

SKILLS

- Laravel
- PHP
- JavaScript
- Python
- HTML & CSS
- OOP & Data structures
- C/C++
- Critical Thinking
- Teamwork

WORK EXPERIENCE

Full Stack Developer

SEP. 2024 - FEB 2025

Digital Agency

- Developed and maintained multiple web applications using PHP and Laravel, handling both back-end and front-end tasks.
- Built and optimized e-commerce platforms with online payment integration, courier service APIs and complex admin dashboards.
- Designed and implemented web applications for managing participant registration and event organization in the medical field.
- Led the back-end architecture and implemented front-end components under the guidance of the team leader.
- Ensured application scalability, security, and performance optimization.

PERSONAL PROJECTS

"Trivia" - using JavaScript, Python, HTML & CSS

Bachelor's thesis project

It is a web application that involves the use of HTML & CSS, Bootstrap and JavaScript, AJAX, Web Sockets for client synchronization on the frontend. On the backend, the Python language was used along with the Flask framework.

Trivia is an application where users can participate in real-time online general knowledge games by answering questions from various categories.

"MyInsta" - using Laravel PHP framework

In this personal project, I developed a clone of the "Instagram" application from scratch using the Laravel PHP framework. "MyInsta" includes all the core functionalities of Instagram, such as creating and editing profiles, following and unfollowing other users, and a feed section where posts appear. Additionally, the application supports photo uploads, likes, comments, and notifications, providing a comprehensive social media experience.
