- HTML & CSS

CERNAT GEORGE LUCIAN

WORK EXPERIENCE

Laravel Backend Developer   APR. 2025 - PRESENT
Webis

- Built and maintained complex web applications using Laravel and PHP, including new feature development and technical improvements.
- Developed and integrated REST APIs to enable data exchange between external systems and client platform.
- Worked closely within the team to define requirements and implement scalable solutions.

Full Stack Developer   SEP. 2024 - FEB 2025
Digital Agency

- Developed multiple web applications using PHP and Laravel, handling both back-end and front-end tasks.
- Built and optimized e-commerce platforms with online payment integration, courier service APIs and complex admin dashboards.

PERSONAL PROJECTS

"MyOffice" - using Java Spring Boot

In this team project, we built a medical office management application using Java Spring Boot. My work primarily focused on backend development and unit testing. Using the Scrum methodology, we developed a system that allows doctors to register and manage their own medical offices. The application allows patients to maintain a medical file with a full visit history across different offices.

"Trivia"- using JavaScript, Python, HTML & CSS
Bachelor's thesis project

It is a web application that involves the use of HTML & CSS, Bootstrap and JavaScript, AJAX, Web Sockets for client synchronization on the frontend. On the backend, the Python language was used along with the Flask framework.
Trivia is an application where users can participate in real-time online general knowledge games by answering questions from various categories.
