ABOUT ME

Junior Software Engineer with professional experience in building web applications using Laravel, PHP, Vue.js, JavaScript and RESTful API development. Passionate about writing maintainable code and contributing to projects that really matter.

PROFESSIONAL EXPERIENCE

Full Stack Developer

OCT 2025 - PRESENT

Self-employed

- Full-stack development with Laravel & Vue.js
- SaaS applications, admin dashboards, and web apps
- API development & third-party integrations
- Scalable, business-oriented solutions

Full Stack Developer

APR 2025 - OCT 2025

Webis

- Developed back-office web applications for managing eCommerce stores using Laravel (backend), Vue.js (frontend), and MySQL.
- Implemented key features such as product management (stock, pricing, visibility), page content editing, and invoice generation directly from the admin panel.
- Built RESTful APIs enabling communication between clients and retailers.
- Integrated external APIs for data exchange, product information retrieval, stock reservation, and order processing.
- Contributed to performance dashboards displaying store analytics (orders, top-viewed products, etc.).
- Collaborated in an agile team and followed best practices in software design, REST API architecture, and UI/UX standards.

Full Stack Developer

OCT 2024 - FEB 2025

Digital Agency

- Developed multiple web applications using PHP and Laravel, handling both back-end and front-end tasks.
- Integrated new features and optimized e-commerce platforms, including online payment systems, courier service APIs, and admin dashboards serving as the back-office.

EDUCATION

Faculty of Computer Science

2021 - 2024

Alexandru Ioan Cuza University of Iasi

- Bachelor of Computer Science

“Emil Racoviță” Theoretical High School

2017 - 2021

- Specialization in Computer Science
